- ☐ Other

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-18, drawn to nucleic acid probes and methods of use, classified in Class 435, subclass 6.

II. Claims 19-34, drawn to peptides, antibodies, and methods of use, classified in Class 435, subclass 5.

The inventions are distinct, each from the other because of the following reasons:

The invention of Group I is drawn to nucleic acid probes and methods of use while Group II is directed to peptides, antibodies against the peptides, and methods of use. The searches of each group would not be coextensive.

Because these inventions are distinct for the reasons given above and have acquired separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
